(54) Title: **DEVICE FOR PLACING A LAMP IN A REFLECTOR**

(57) Abstract: In a device for placing a lamp in a reflector, a socket (1) for holding a lamp is provided with a main body part (2), with a reference plane (16) to be brought into contact with the a reflector surface, with means (3) for holding the lamp at one side of the reference plane, with a resilient annular spring (5) secured to the main body part at the opposite side of the reference plane, and with two upright arms (7) provided with clicks (8), while a back plate (11) is provided with pressure points (14). When securing the back plate to the reflector, the reference plane (16) is brought into contact with said reflector surface, and the pressure points (14), when in contact with the clicks (8) of the socket, displace the clicks (8) in the direction of the reflector over a distance  $\Delta x$  so as to put the annular spring (5) under tension, said distance  $\Delta x$  being such that the annular spring (5) presses the reference plane towards the said reflector surface with a force of at least 5N, preferably with a force of at least 10 N.

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 F21V19/00

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 F21V H01J H01K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

### \* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the International filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
